

USER GUIDE – STEP 5. ADDING GROUPS

A very useful feature of the software is that a registered user can keep track of other individuals. For example, these could be people in their household, or indeed for primary or secondary school teachers, it could be children in their class (once permission was received from parents/guardians).

Following a login, the user must select the “Your Results” option.

Your account

-  **Newsletter**
-  **Weekly survey**
-  **My profile**
-  **Your results**
-  **Account settings**
-  **Log out**

You can add multiple people (i.e. from your household, class or company) through "Your results". Each account can only have one **username** and **email address**. To leave feedback or get support, **contact us**.

From there, click on the + sign just beside your name.

Thanks - your diagnosis: Common cold

The last survey was submitted for on Oct. 11, 2013, 1:05 p.m.

Name	+	Survey	Status
<input type="checkbox"/> 		 Report	 Change background
		 11/10	

A screen will then be displayed asking you to add the name of the person you want to add to the survey.

Your results

A new person has been added.

The last survey was submitted for I on Oct. 11, 2013, 1:05 p.m.

<input type="checkbox"/> Name	+	Survey	Status
<input checked="" type="checkbox"/> Extra Person		<input type="checkbox"/> Report	<input checked="" type="checkbox"/> Change background
<input checked="" type="checkbox"/>		<input type="checkbox"/> Report	<input checked="" type="checkbox"/> Change background

The health status of each participant is based on the symptoms you reported. **This is not a medical diagnosis.** We only ask for symptoms indicative of influenza-like illness, common colds, allergies and gastric flu. If you have other symptoms, or you are at all worried, we recommend that you contact your doctor.
